# Is there a universal inverter from 12V to 72V

## Overview

---

Do I need a 12V or 48V inverter?

Simply put, if you have a 12V system, you need a 12V inverter; a 48V system requires a 48V inverter. Standard Pure Sine Wave inverters simply change DC power to AC power. Inverter Chargers handle this function plus allow you to charge your batteries off shore power or a generator. Renogy's 3500W Solar Inverter Charger is designed for a 48V system.

Can a 12V 72V inverter be converted to each other?

A1: No, 12V~72V cannot be converted to each other. You can only choose one of the input voltages, and the inverter input voltage must be consistent with the system input voltage. For example: a 72V inverter can only be used for a 72V battery. Q2: How to select the output voltage:.

What is a 12V solar inverter?

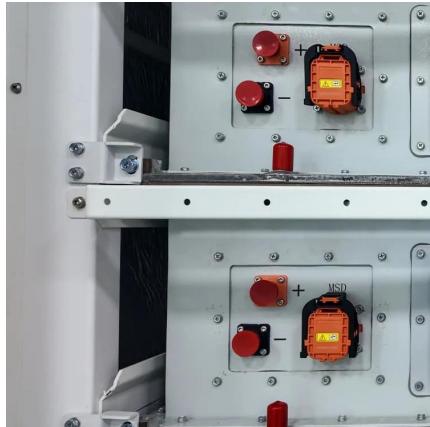

The inverter's job is to turn power from DC to AC. 12V solar panels are applicable for small size solar system projects for: Most RV and motorhomes already have 12V batteries for AC, refrigerator, water heater control and lighting. So it makes perfect sense to use 12V for these type of systems.

What is a 12V 240V inverter?

A 12v to 240v inverter is a great way to save energy. These devices convert DC power to AC power, which enables the user to use less energy when powering electronic devices. 2. Remote Control Some inverters come with remote control, which makes it easy to turn the device on and off. 3. USB Port
