

# Jamaica s ultra-large capacity photovoltaic container

## Overview

---

Operational since 2019, Paradise Park is Jamaica's largest solar facility, with a capacity of 51 MWp, delivering the island's most cost-effective energy. Will JPS build a solar power plant in Jamaica?

Power utility Jamaica Public Service Company, JPS, is investing US\$300 million to construct Jamaica's largest solar power plant and a battery storage facility, starting this month. The renewable energy facility will replace JPS's aged Hunts Bay.

Will Jamaica generate half of its energy by 2030?

The project aligns with Jamaica renewable energy programme, which made seeks to generate half of the country's energy from wind, solar or other renewables by 2030. Sign up for The Gleaner's morning and evening newsletters.

Who owns Jamaica's energy grid?

Jamaica's energy grid comprises 789MW of capacity, 80 per cent of which is owned by the JPS. The utility purchases 168MW from independent power producers that are contracted to supply electricity to the national grid, JPS said last month in tender documents to suppliers.
