

Large-capacity folding container used for drone station in Democratic Republic of Congo

Overview

How much cargo can a drone carry?

The patented Droneliner is a transformational global airfreight system. It can carry 350 tons of cargo in up to 80 lightweight 20ft shipping containers in a remotely-piloted roll-on/roll-off drone, providing low-cost, low-emissions, fast worldwide bulk cargo delivery. Decisions to ship by air or sea come down to two factors – Cost and Time.

What is a drone delivery box?

Hinco's drone delivery box is one of the types of drone package container, which is developed for the standardization of Hinco drone delivery process. The box is characterized by a foldable high-strength metal clip. The drone delivery box has various sizes and is very suitable for transportation & storage, and it can be used repeatedly.

What is a box for a drone?

The box is made of cardboard and can be reused. The box is covered with a layer of thin film, and can sustain for a period of time in the air when it rains. Ideal for mechanical loading to the drone. Support parachute module.

What is hinco drone delivery box?

Support parachute module. Hinco's drone delivery box is one of the types of drone package container, which is developed for the standardization of Hinco drone delivery process. The box is characterized by a foldable high-strength metal clip.
