

Manila wind power energy storage cabinet transportation

Overview

Are there opportunities in the Philippines for US energy storage systems?

There are opportunities in The Philippines for U.S. suppliers of energy storage systems. The Philippine Government continues to state its goal to be energy self sufficient as mounting energy challenges loom. The Department of Energy (DOE) is looking into utilizing renewable energy, and modernizing and deploying an efficient grid system.

What is the future of energy storage in the Philippines?

Under the Philippine energy scenario, peak demand is seen growing by 5.3 percent annually until 2028. Energy storage is stepping into the spotlight of the country's green transition, with more companies making bold investments to unlock its game-changing potential.

How many MW of new storage capacity will be built in Philippines?

Around 1,340 MW of new storage capacity, meanwhile, still does not have a definite commercial operations date. The construction of these facilities is expected to augment the country's power supply amid growing energy demand. Under the Philippine energy scenario, peak demand is seen growing by 5.3 percent annually until 2028.

How much battery storage capacity will the Philippines have?

As the Philippines gears up for the entry of more renewables into the grid, the government anticipates close to 2,000 MW of battery storage capacity to complement them. According to DOE data as of end-March, ESS projects with a combined capacity of 594 MW are committed to come online over the next three years.
