

# **Market share of energy storage cabinet batteries in China**

## Overview

---

Will China be a leader in energy storage capacity by 2034?

By 2034, China is projected to be a global leader in energy storage capacity, with electrochemical batteries, especially lithium-ion, expected to dominate the market. Energy storage systems are widely used as EV battery storage systems such as lithium ion batteries.

What is China's energy storage industry?

The China energy storage industry reached USD 99 billion, USD 155.3 billion and USD 223.3 billion in 2022, 2023 and 2024 respectively. The pumped hydro technology battery uses excess electricity to pump water from lower to upper reservoir. The technology offers longer duration storage.

What is the battery production capacity in China?

China is one of the leading countries in the world in terms of battery production; for instance, in 2021, The total battery production capacity in China was around 558 GWh. In 2021, the global battery production capacity was around 600 GWh. Furthermore, Chinese battery manufacturers have announced plans to build over 3,000 GWh capacity by 2030.

What is the energy storage capacity in China in 2021?

In 2021, The energy storage capacity in China was 46.1 GW; the pumped hydro segment is dominating the energy storage market in China with a total installed capacity of 39.8 GW, which is around 83% of total energy storage capacity.
