

# Mauritania off-grid solar power generation system

## Overview

---

How will Mauritania's new solar power project help agri-food industry?

The project will provide rural electrification for 40 localities in south-eastern Mauritania, through the installation of hybrid mini photovoltaic power plants and the construction of connecting lines. The project will also support value-creating activities, especially in the food cold chain and agri-food processing.

Why should Mauritania invest in wind & solar energy?

Mauritania has high-quality wind and solar resources whose large-scale development could have catalytic effects in supporting the country to deliver universal electricity access to its citizens and achieve its vision for sustainable economic development.

How much money does Mauritania receive from the AfDB & GCF?

Her fiction and non-fiction narratives captivate and resonate with a diverse audience, showcasing her versatility and depth as a writer. Mauritania receives \$289.5 million from the AfDB and the GCF to develop solar power generation, transnational electricity interconnection and rural electrification.

Who is Mauritania's AfDB?

The AfDB has been active in Mauritania for over 50 years, supporting various strategic development sectors, such as agriculture, governance, water and sanitation, energy, mining, private sector, transport, and social. Source: Zawya Motoni Olodun, with an illustrious seven years in marketing operations, stands as a beacon in the field.

## Mauritania off-grid solar power generation system
