

Mobile energy storage container fast charging sales in Democratic Republic of Congo

Overview

Why is the Democratic Republic of the Congo so important?

Although China has invested capital into multiple mineral-rich nations, the Democratic Republic of the Congo (DRC) stands out because of its vital role in the cobalt market. The DRC produces 80 percent of the world's cobalt—Chinese state-owned enterprises and policy banks control 80 percent of the total output.

What is happening in the DRC?

The DRC, Africa's second-largest and fourth most populous country, has been devastated by internal conflict for decades, including two wars since the mid-1990s and ongoing rebel violence in the east that required a 24-year-long UN peacekeeping mission, with Chinese participation.

Why is the DRC important to China?

The DRC is essential to China's position in the global market: 67.5 percent of China's refined cobalt comes from the DRC.
