

# **New 20kw low voltage three-phase energy storage inverter**

## Overview

---

What is a 20kW low-voltage inverter?

This state-of-the-art 20kW low-voltage inverter adopts SiC components, offering unparalleled performance while significantly reducing product volume. This breakthrough enhances efficiency and sets a new industry standard for compact design. The inverter's 48V battery setup provides a cost-effective and safe energy storage solution.

Which inverter is best?

With its advanced features, user-friendly design, and superior performance, it stands as a leading solution in the market. Deye SUN-20K-SG05LP3: The world's first 20kW low-voltage three-phase hybrid inverter. This SiC MOSFET-based inverter boasts a maximum 350A charging/discharging current.

What is a 20A+20A solar inverter?

Supporting the latest in solar technology, the inverter features a 20A+20A PV input current, accommodating the new generation of high-current PV modules. It also supports a maximum PV input power of up to 30kW, meeting the installation requirements of larger PV arrays.

What is a s6-eh3p hybrid inverter?

The S6-EH3P (15-30)K-H-LV-ND three-phase hybrid inverters are suitable for commercial PV energy storage systems with a 230VAC grid. Boasting a maximum charge/discharge current of 70A+70A across two independently controlled battery ports, it has four integrated MPPTs with a string current capacity of up to 20A, ensuring unmatched power delivery.
