

New energy storage production plant

Overview

Where is Tesla's first energy storage plant located?

Tesla's first overseas energy storage plant starts operating as global competition from Chinese firms and pricing pressures mount. Tesla has officially announced the start of production at its Shanghai energy storage factory, the company's first Megapack manufacturing facility outside the United States.

What is the future of energy storage?

The mass production of these units is expected to start next year with an initial output of 10,000 units annually, equal to around 40 GWh of energy storage. The future of renewable energy relies on large-scale energy storage. The Shanghai Megafactory, Tesla's first energy storage facility outside the US, covers approximately 200,000 square meters.

What is Tesla's new energy storage Gigafactory?
