

# North America is getting solar air conditioning

## Overview

---

Are solar-powered air conditioners a viable alternative to traditional cooling methods?

As the demand for sustainable energy solutions grows, solar-powered air conditioning systems are emerging as a promising alternative to traditional cooling methods. These systems harness the sun's energy to power air conditioners, offering a greener and potentially more cost-effective way to stay cool.

Are solar-powered AC systems a good idea?

These systems harness the sun's energy to power air conditioners, offering a greener and potentially more cost-effective way to stay cool. However, like any technology, solar-powered AC systems have their advantages and limitations.

Are solar air conditioners worth it?

Solar air conditioners usually cost more than traditional cooling systems. But the upfront expense is worth it to many because of the monthly energy savings. We found that the investment in a solar AC generally pays for itself within 10 years of purchase. Angi reports the average homeowner spends \$3,400 on a solar air conditioner.

How much does a solar AC cost?

We found that the investment in a solar AC generally pays for itself within 10 years of purchase. Angi reports the average homeowner spends \$3,400 on a solar air conditioner. In general, they cost \$1,600-13,000. Mini splits are more affordable, while solar-powered central air conditioners cost more.
