

Off-grid solar-container hybrid system used at the Palikil drilling site

Overview

What is off-grid solar & hybrid power?

Off-grid solar systems and hybrid power ensure consistent energy supply in remote mining locations. With solar integration, battery storage, and backup generators, these industrial energy solutions deliver uninterrupted power to keep operations running smoothly. Save time and money by replacing or reducing reliance on diesel fuel.

What is an off grid solar container unit?

Attaching to the grid can also be expensive and this can be an issue in the UK as well as Africa or Latin America. An Off Grid solar Container unit can be used in a host of applications including agriculture, mining, tourism, remote islands, widespread lighting, telecoms and rural medical centres.

Are off grid solar containers reliable?

Solar equipment is very reliable but occasionally parts may fail so there is need to monitor and solve any problems. Off Grid Solar container units guarantee security and reliability and allow the engineering team to complete installations in a few days rather than weeks.

Can a containerized Solar System be installed off-grid?

Off-Grid Installer have the answer with a containerized solar system from 3 kw up wards. Systems are fitted in new fully fitted containers either 20 or 40 foot depending on the size required.
