

Pakistan entry requirements for outdoor power supplies

Overview

What is the supply voltage in Pakistan?

In Pakistan the supply voltage is 230V. If the appliance is a single voltage rated appliance, it will need to operate at the same voltage as the supply voltage of the country i.e. 230V. If this is not the case it should be used alongside a voltage transformer or converter to allow the appliance to work safely and properly.

Do I need a converter in Pakistan?

This means that you will not need a converter or transformer but just a travel adaptor, because Pakistan operates on a 230V supply voltage, which is within the 110-240V range that the dual voltage appliance operates on. In Pakistan the supply voltage is 230V.

Does Pakistan need a plug adapter?

In Pakistan, the standard voltage is 230V, and the power frequency is 50Hz. The commonly used plug types are C, D, G, and M. Generally, travelers may need a plug adapter but do not require a voltage converter. Major mobile network operators include Jazz, Telenor, and Zong, which support 4G networks, making them very useful for travelers.

What type of plug does Pakistan use?

It is important to note that it does not convert the voltage or frequency. For Pakistan there are two associated plug types, C and D. Plug type C is the plug which has two round pins and type D is the plug which has three round pins in a triangular pattern. Pakistan operates on a 230V supply voltage and 50Hz.
