

# **Pretoria coal-to-electricity energy storage device**

## Overview

---

Are energy storage technologies a viable solution for coal-fired power plants?

Energy storage technologies offer a viable solution to provide better flexibility against load fluctuations and reduce the carbon footprint of coal-fired power plants by minimizing exergy losses, thereby achieving better energy efficiency.

Who owns Pretoria West power station?

Unit-level coordinates (WGS 84): This ownership tree is part of the Global Energy Ownership Tracker, a project of Global Energy Monitor. Pretoria West power station is a coal-fired power plant with a total capacity of 180 MW. The plant was built in 1952, and is owned by Tshwane Electricity Division.

Can energy storage systems be integrated with fossil power plants?

Several studies have been reported in the literature, particularly on power plant system modeling, and integration of sensible and latent heat-based energy storage systems with fossil power cycles , . Liquid air energy storage (LAES) is another form of energy storage that has been proposed for integration with fossil power plants.

Could Tshwane get a solar power plant?

The general manager of Eskom real estate sought to connect Tshwane with companies that could lease the two power stations' land and operate as Independent Power Producers. The Pretoria West and Rooiwal sites reportedly had "strong potential" for both solar and gas projects.
