What is a double glass solar panel?

Glass-glass module structures (Dual Glass or Double Glass) is a technology that uses a glass layer on the back of the modules instead of the traditional polymer backsheet. Originally double-glass solar panels were heavy and expensive, allowing the lighter polymer backing panels to gain most of the market share.

What is double glass photovoltaic module?

Preface To further extend the service life of photovoltaic modules, double glass photovoltaic module has recently been developed and studied in the PV community. Double glass module contains two sheets of glass, whereby the back sheet is made of heat strengthened (semi-tempered) glass to substitute the traditional polymer backsheet.
