# Price per Phase for Mobile Energy Storage Containers in Western Europe

## Overview

---

How much does battery storage cost in Europe?

The landscape of utility-scale battery storage costs in Europe continues to evolve rapidly, driven by technological advancements and increasing demand for renewable energy integration. As we've explored, the current costs range from €250 to €400 per kWh, with a clear downward trajectory expected in the coming years.

What are the key market trends for battery storage?

It covers key market trends, with a particular focus on the shift toward utility-scale storage, the continuing growth of residential and commercial installations, and the evolving role of battery storage in supporting Europe's clean energy goals.

How much does battery storage cost?

The largest component of utility-scale battery storage costs lies in the battery cells themselves, typically accounting for 30-40% of total system costs. In the European market, lithium-ion batteries currently range from €200 to €300 per kilowatt-hour (kWh), with prices continuing to decrease as manufacturing scales up and technology improves.

Will a 72 MW battery energy storage system be available online in 2022?

In September 2022, Global energy company RWE announced they would bring a 72MW battery energy storage system (BESS) online by the end of 2022 in Werne, Germany. The two BESS units are made up of 420 lithium-ion batteries having a combined output of 117 MW.
