

# **Price quote for Lyon Nauan solar energy system in France**

## Overview

---

How much does a solar installation cost in France?

Shadows can significantly reduce the energy output of your solar panels. The price of a solar installation depends on several factors such as power (expressed in kilowatt-peak, or kwc), the technology chosen and installation costs. On average in France, count between 2500 and 4000 euros excluding tax per kwc for a residential installation.

Why are French PV system owners using more solar power?

Lower payments for PV energy fed into the grid are pushing PV system owners in France to use more of their own solar power. The solar energy market in France is changing quickly. In 2024, the French government introduced significant cuts to feed-in tariffs (FITs) – the rates paid to PV system owners for feeding surplus electricity into the grid.

Should you invest in photovoltaic solar panels in France?

Invest in photovoltaic solar panels in France is an important decision for many individuals. With this technology, you can produce green electricity, save money on your energy bills and even generate additional income. Find out everything you need to know about solar panels in France to make the best possible choice.

Can you sell solar panels in France?

In France, it is possible to sell the electricity produced by your solar panels to EDF or another energy supplier. The feed-in price depends on the power of your installation and the conditions of the contract. The average lifespan of solar panels is around 25 years.
