

# Roman PV Energy Storage Requirements

## Overview

---

How many GW of energy storage will Romania have?

Romania is aiming to have at least 2.5 GW of energy storage installed by the end of next year and to exceed 5 GW only a year later. Romania's parliament has adopted a bill mandating prosumers with PV systems with capacities from 10.8 kW to 400 kW to install energy storage systems.

Can a prosumer install a solar system in Romania?

Romania's parliament has adopted a bill mandating prosumers with PV systems with capacities from 10.8 kW to 400 kW to install energy storage systems. OMV Petrom, a majority-owned Romanian oil and gas supplier, has purchased a 50% stake in three solar projects in Romania.

How many largescale photovoltaic projects are there in Romania?

Here are some considerations based on this research. Romania has made significant strides in developing large-scale photovoltaic (PV) projects, contributing to its renewable energy goals. As of the latest data available, there are over 880 large-scale PV projects in Romania, boasting a cumulative capacity of approximately 46,600 MW.

How many MW of solar will be built in Romania?

The first round will include 500 MW of solar, with the remaining capacity to be allocated in next year's tender. The European Bank for Reconstruction and Development and Eiffel Investment Group are providing €24.4 million in funding for the construction of a 60 MW solar plant in southern Romania.

## Roman PV Energy Storage Requirements
