

# **Rooftop solar panel self- investment price**

## Overview

---

As of 2024, the average cost for a residential solar panel system in the United States is between \$15,000 and \$25,000 before any tax credits or incentives. Is rooftop solar a good investment?

Rooftop solar power represents one of the most impactful decisions homeowners can make for their finances, energy independence, and environmental impact. With 2025 bringing continued cost reductions, technological improvements, and strong federal incentives, the value proposition for rooftop solar has never been stronger.

What is rooftop solar power?

Rooftop solar power, also known as rooftop photovoltaic (PV) systems, refers to solar panels installed on residential or commercial building rooftops to generate electricity. These systems convert sunlight directly into electrical energy through photovoltaic cells, providing clean, renewable power for your home or business.

How efficient are rooftop solar panels?

Modern solar panels achieve efficiencies of 18-22% for residential applications, meaning they convert roughly one-fifth of the sunlight that hits them into electricity. Premium panels from manufacturers like Panasonic can achieve even higher efficiencies, reaching 22-24%. A complete rooftop solar system consists of several essential components:.

Is a solar roof suitable for a photovoltaic system?

Our Solar Calculator analyzes the profitability of a PV system for you. If the roof is suitable for a photovoltaic system, the question often arises: Is the investment worth it?

From a purely ecological point of view, this question can always be answered with a yes.

## Rooftop solar panel self-investment price
