

# **Sanaa computer room UPS uninterruptible power supply**

## Overview

---

What is an uninterruptible power supply for server room use?

An uninterruptible power supply for server room use is a backup power solution that kicks in instantly when the main power source fails or fluctuates. It bridges the gap between a power outage and the switchover to a backup generator or safe shutdown.

What is an uninterruptible power supply (UPS)?

Uninterruptible Power Supply (UPS) | Schneider Electric Hong Kong, China. An Uninterruptible Power Supply system provides emergency power when the main source fails, using batteries to ensure a continuous supply. It conditions incoming power, protecting equipment from fluctuations. We offer various UPS power supply types for different needs.

How does ups work in a server room?

UPS for server room works in three main ways of functioning. Here, the UPS gets its power from the regular power supply. This supply has the right voltage and frequency the UPS needs to work. During the Normal Mode a piece called a rectifier changes AC power to DC power. This powers up an inverter and charges batteries.

Does a server room need an ups?

A UPS does more than just deliver backup power during a power cut. It's key in smoothing out power. Server rooms don't like ups and downs in power, or sudden increases. These can damage things and make things slow. A UPS takes away these problems, giving a clean, steady supply.
