Solar Monocrystalline Silicon Shingles

Overview

What are monocrystalline silicon solar panels?

Monocrystalline silicon sun-energy panels are more widely used in solar rooftop systems. These panels are commonly preferred for large-scale solar PV installations. Such solar panels are used in different sectors such as industrial, commercial, or residential.

Are solar shingles durable?

Solar shingles are more durable than most standard roofing materials, even in harsh weather conditions like hail, snow, rain and high wind. At SunStyle, we believe that building integrated photovoltaic (BIPV) products are key to the clean energy transition.

What are solar tiles made of?

Our solar tiles are manufactured with the highest quality PERC monocrystalline photovoltaic cells to maximize the efficiency of your roof. SunStyle ® is a structural roof and solar module combined, providing a durable, leak-proof roofing solution that is both beautiful and protective.

What is a dragon-scale solar roof?

Inspired by the traditional slate shingle roofs of the Swiss alpine region, the dragon-scale pattern of our solar roof is both functional and fully-integrated delivering a harmonious aesthetic. Our solar tiles are manufactured with the highest quality PERC monocrystalline photovoltaic cells to maximize the efficiency of your roof.
