

# Solar Street Light Sprinkler System

## Overview

---

What is a solar street light?

A solar street light is a raised lighting system powered by a photovoltaic (PV) module charging a battery that runs an LED luminaire at night. Modern systems are off-grid, smart-controlled, and designed to operate through low-sun periods. Pole/brackets & wiring, optional sensors/remote monitoring.

How to design a solar street light?

1. Solar Street Lighting Demand Design Formula:  $P_{LED} = E \times A / (\eta \times U \times K)$   
Example: Road width 6m, distance between lights 25m, target illuminance 20 lx →  $P_{LED} = 20 \times (6 \times 25) / (0.85 \times 0.5 \times 0.75) = 20 \times 150 / 0.32 \approx 94W$  → Choose a 100W LED module (Luminous flux 15,000 lm)  
2. Solar Street Light Photovoltaic System Capacity Calculation Steps: 3.

Are solar streetlights environmentally friendly?

If you are looking for an environmentally friendly light source for the street, nothing can beat solar streetlights. These lights save electricity and play a role in minimizing the effect of global warming. Solar streetlights get power from sunlight.

Who makes solar streetlights?

Sokoyo started its journey as a solar streetlights manufacturer and distributor in 2008. It is one of the top solar streetlights companies and supplies the lights in Africa, Australia, Asia, and 70 other countries. This company provides two types of solar streetlights: split type and gel battery solar streetlights.
