

# Solar balcony power generation system

## Overview

---

How does balcony solar work?

Just plug in! It's really that easy. "Balcony Solar" is a totally independent power system, so to use it you'll need to plug your devices directly into the portable power station and it basically operates like a giant battery. Remember, every watt of electricity you generate from here is free fuel for your favorite device!.

Why should you choose a balcony PV system?

Balcony PV system avoid these restrictions, and make better utilization of space. Especially for tenants, its rapid installation and disassembly are more convenient. By using a small plug-in solar power plant, you can produce your own solar power and be a model towards climate protection and energy transition!.

Is balcony solar off-grid?

If you want to brag about your new "Balcony Solar" install, it's true that any device connected to the power station is "off-grid". If you have a monitoring system, you can track your power generation, and leverage peak charging times with extra sun exposure. Most importantly, enjoy the empowering feeling of making your own power!.

What is a balcony power plant?

Balcony power plants built in balcony also known as a self-generation system, is usually installed on south-facing balconies, terraces, gardens, garages, small roof tops, fences, etc. You can install this self-generation station where you live, even if you're a renter.
