

# Solar carport panels waterproofing

## Overview

---

Why do you need a solar carport system?

By directing rainwater away from your vehicle and the structure, this system prevents potential damage and simplifies maintenance. Built from materials selected for their superior corrosion resistance, our Solar Carport Systems stand resilient through all weather conditions, ensuring your investment remains robust and enduring.

Why do solar carports need water guttering?

Our integrated water guttering system ensures the long-term durability of your solar carport. By directing rainwater away from your vehicle and the structure, this system prevents potential damage and simplifies maintenance.

Can a solar carport be installed on a roof?

Unlike roof-mounted solar panels, a solar carport cannot be installed on a roof. It is a standalone structure designed to provide shade and generate solar power for vehicles.

Can PV panels be installed on a solar carport structure?

Yes, PV panels can be installed on a solar carport structure. Installing PV panels on a solar carport makes great use of an otherwise unproductive space at both the domestic and commercial level.
