

# Solar container battery project expansion

## Overview

---

Will Envision Energy's 8 MWh battery fit in a 20 ft 6 m shipping container?

Envision Energy announced an 8-MWh, grid-scale battery that fits in a 20-ft (6-m) shipping container this week while at the third Electrical Energy Storage Alliance (EESA) exhibition held in Shanghai. Taken from Envision Energy's website, this is a possible design configuration of its 8-MWh, 20-ft (6-m) container battery It's colossal.

What are hybrid solar-storage projects?

Thanks to the aforementioned factors, hybrid solar-storage projects are in trend globally. Developers are increasingly building solar PV and battery systems as one integrated plant, capturing synergies in construction, grid connection, and operation.

Are solar & storage projects a good investment?

The cost of lithium-ion batteries continues to plummet, making solar plus storage projects more financially attractive than ever. Globally, average battery prices fell by over 20 percent in 2024 alone – and even steeper drops were seen in China where battery prices declined as much as 40 percent year-on-year.

Can solar energy be stored in a battery?

Crucially, adding storage to solar dramatically enhances the value of solar energy. A recent modeling study of a 300 MW solar plant in South Australia found that including an equal-sized battery (300 MW with 2 hours storage) would increase the energy exported to the grid by 33 percent, and boost project revenues by an astonishing 170 percent.
