

Solar container energy storage system Project Background

Overview

What is energy storage container?

SCU uses standard battery modules, PCS modules, BMS, EMS, and other systems to form standard containers to build large-scale grid-side energy storage projects.

What is a Solax containerized battery storage system?

SolaX containerized battery storage system delivers safe, efficient, and flexible energy storage solutions, optimized for large-scale power storage projects. As the world increasingly transitions to renewable energy, the need for effective energy storage solutions has never been more pressing.

What is a solar container?

Our Solar Containers are designed in a way to maximize ease of operation. It's not only meant to transport PVs but also to unfold them on site. It is based on a 20' sea container. The efficient hydraulic system helps quickly prepare the Solar to work. Because of their construction, our containers offer unmatched flexibility and mobility.

How to implement a containerized battery energy storage system?

The first step in implementing a containerized battery energy storage system is selecting a suitable location. Ideal sites should be close to energy consumption points or renewable energy generation sources (like solar farms or wind turbines).
