Solar glass of a factory

Overview

What is a solar glass factory?

Solar glass factories are backing the clean energy industry and are critical for the manufacturing of modules installed in utility-scale solar farms, rooftop systems, and building-integrated photovoltaics (BIPV).

What is solar glass manufacturing plant?

Solar glass manufacturing plant is a facility specifically for making specialized low-iron, high-transmittance glass for use in photovoltaic (PV) modules. It entails raw material melting, float or rolled glass forming, annealing, cutting, tempering, and surface treatments like anti-reflective or self-cleaning coatings.

What is solar glass?

Solar glass refers to high-transparency, low-iron tempered glass that is specifically designed to optimize transmission of solar energy while safeguarding photovoltaic (PV) cells. It provides superior optical clarity, mechanical stability, and weather resistance to make it suitable for application in solar panels.

Who makes solar Photovoltaic Glass?

As a leading solar photovoltaic glass manufacturer, it is a holding business for investments that produces and sells photovoltaic glass goods. IRICO Group is widely recognized as one of the world's top solar photovoltaic glass manufacturers. It was founded in 1984 and is currently headquartered in Beijing, China.
