

Solar industry energy storage in 2025

Overview

How big will energy storage be in 2025?

Global energy storage installations are projected to grow by 76% in 2025 according to BloombergNEF, reaching 69 GW/169 GWh as grid resilience needs and demand balloon. Global energy storage projections are staggering, with a potential acceleration to 1,500 GW by 2030 following the COP29 Global Energy Storage and Grids Pledge.

How many batteries will the energy storage industry install in 2025?

Nearly a decade ago, when the energy storage market was in its infancy, an industry organization set a dreamy goal: By the end of 2025, the U.S. would deploy 35 gigawatts of batteries connected to the grid. So how'd the storage industry do?

In the third quarter, 4.7 gigawatts of batteries were installed.

Which emerging markets will lead the storage industry in 2025?

In Latin America, momentum was built as storage deployments increased by 42%. In 2025, emerging markets for storage will be on the rise. Saudi Arabia will lead the charge, fuelled by its expansion of solar and wind generation.

Which countries will see the most solar power installations in 2025?

The US saw record installations and another 20% in growth is forecast for 2025 – though President Trump's re-election has brought policy uncertainty. China held its leading position in terms of capacity growth due rapid adoption of wind and solar energy and required pairing with storage systems.
