

# **Solar power satellite factory in Australia**

## Overview

---

Are solar panels made in Australia?

Yet just a fraction of the solar panels we use today are made in Australia – something the Albanese Government is working to fix. The Australian Renewable Energy Agency (ARENA) has awarded \$46 million to Australian solar company 5B to scale up production of its Maverick solar units at its Adelaide manufacturing facility.

What is the Albanese government doing to build Australia's future?

The Albanese Government is building Australia's future by investing in local solar panel manufacturing, with an Adelaide facility securing the first round of funding from the Government's \$1 billion Solar Sunshot program. The Albanese Government's Solar Sunshot program is a key component of our plan for a Future Made in Australia.

Can a solar power satellite be made up of repeatable building blocks?

The newly proposed solar power satellite (called SPS - ALPHA) has been re-designed to be made up of many repeatable building blocks that can be assembled in space instead of manufacturing one, expensive, single large system.

Why is Tindo developing Australia's first solar panel manufacturing Gigafactory?

Tindo is developing Australia's first ever solar panel manufacturing Gigafactory to meet the growing demand for Australian-made renewables. The new factory will be a hub for Australian solar innovation and be a catalyst for a domestic solar supply chain.
