

# **Solar power station in China in Karachi**

## Overview

---

When will 900 MW photovoltaic power stations be completed in Pakistan?

Affected by the change in purchase price policy, the 900 MW photovoltaic power stations in Punjab province, Pakistan, which received an investment of USD 1.5 billion from Zenergy Solar Technology Co., Ltd., was scheduled to be completed in June 2016. However, the 600 MW of solar energy generation is still in the construction stage.

Are China and Pakistan a good investment area for solar energy?

Currently, the photovoltaic enterprises in China are beginning to explore emerging markets successively, with Pakistan becoming one of their newly developing investment areas for solar energy. Meanwhile, China and Pakistan's energy power stations gradually provided a powerful impetus for economic development in the country.

Why is China promoting the solar energy industry in Pakistan?

China has made huge technological advances in the development of photovoltaic power, which are conducive to promoting the demonstration and technology transfer of the solar energy industry in Pakistan.

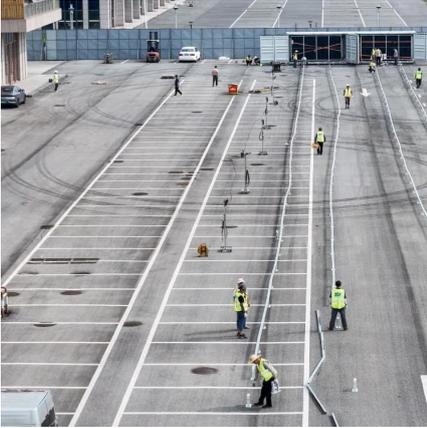

How much does a solar power station cost in Pakistan?

Afterward, the National Electric Power Regulatory Authority (NEPRA) of Pakistan approved the transmission electricity price of solar power stations of 17.85 Rupees per kWh in the northern regions and 17.12 Rupees per kWh in the southern regions.
