

Solar power storage operation and maintenance income

Overview

What is solar operation & maintenance (O&M)?

The Solar Operation and Maintenance (O&M) market is poised for sustained growth in the coming years, driven by the increasing adoption of solar energy, expanding installed capacity of solar PV systems, and the growing importance of asset optimization and reliability in the solar industry.

Do photovoltaic systems need maintenance?

The expansion of photovoltaic systems emphasizes the crucial requirement for effective operations and maintenance, drawing insights from advanced maintenance approaches evident in the wind industry. This review systematically explores the existing literature on the management of photovoltaic operation and maintenance.

Are solar energy and battery storage a good investment?

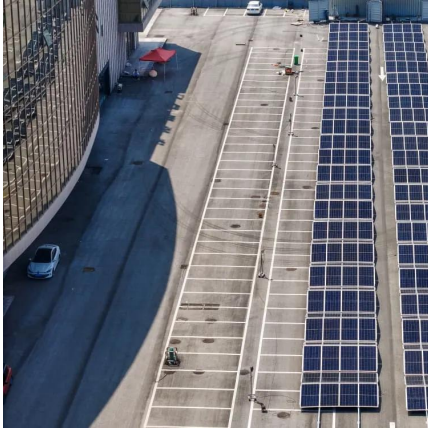

Solar energy and battery storage support employment in good quality and high productivity jobs, with an average GVA per job of £88,800 in 2024, over 40% larger than the UK average. Solar energy and battery storage contribute to economic activity across the UK while supporting the energy transition.

How do solar energy and battery storage support economic activity?

Solar energy and battery storage support economic activity in several ways, as shown below. At the end of 2024 the UK had a total 20 GW of solar capacity and 7.5 GW of battery storage capacity. Over the period to 2035, activity across both technologies could expand significantly.
