

Solar tempered glass specifications and models

Overview

What is Targray solar glass?

Targray supplies solar PV glass materials engineered to enhance the conversion efficiency and power output of solar photovoltaic panels. Our product portfolio features tempered, ultra-clear solar glass solutions with anti-reflective coating that diminishes reflectivity and improves light transmission.

What are ultra-clear patterned solar PV glass solutions?

Ultra-clear, patterned solar PV glass solutions engineered to help maximize light transmission while minimizing absorption and reflectivity – characteristics which contribute to improving overall conversion efficiency in solar cells.

What G-value should a Photovoltaic Glass have?

Photovoltaic glass can be customized to achieve a solar factor between 6% and 41%. A low g-value is desirable to prevent overheating, especially in warm climates, as it prevents the interior temperature from rising too high due to the greenhouse effect.

What is Photovoltaic Glass?

We have manufactured the first photovoltaic glass in the market that comes with low-emissivity properties, provides UV and IR filter, promotes natural light, and generates power. All our solutions offer a multi-functional value. The multifunctional properties of photovoltaic glass surpass those of conventional glass.
