

Somali Communications 6 500 3G outdoor base stations

Overview

Mobile phones and other mobile devices require a network of base stations in order to function. The base station antennas transmit and receive RF (radio frequency) signals, or radio waves, to and from.

Is Somalia lagging behind in the development of telecommunications?

Compared to the United States, Somalia is massively lagging behind in the development of telecommunications. Under the country code +252, there were a total of 9.96 million connections in 2024. Among them were 9.91 million mobile phones, which corresponds to an average of 0.54 per person. In the US, this figure is 1.1 mobile phones per person.

How much does 5G cost in Somalia?

If one does not take a fixed amount in US dollars, but converts it to the economic output per inhabitant, a user in Somalia spends 3.9% of his income on mobile telephony. Worldwide, this rate is around 4.5 percent. In the USA, the monthly cost was around \$47.80. In 2023, network coverage with the 5G standard was already at 10% of all inhabitants.

How many mobile devices can a base station serve?

Each base station can only serve a limited number of mobile devices at a time. As the number of mobile devices in a community grows, more base stations are needed. For that reason, more antennas are needed in such crowded locations as shopping malls where there are many mobile phone users.

How much does a mobile phone contract cost in Somalia?

Every year, the International Telecommunication Union calculates for many countries what a mobile phone contract costs to use. A monthly budget averaging US\$ 1.90 was calculated Somalia in 2024. Compared to the previous year, this amount has fallen by 3 percent.
