Can outdoor solar lights be stored in a garage or basement?

If you have outdoor solar lights, you may wonder if you can store them in your garage or basement during winter. After all, it can be tough to keep up with them when they're not in use. The good news is that, in most cases, it's perfectly fine to store your outdoor solar lights in a garage or basement.

How do you store solar lights in a garage?

However, if your garage is also cold during winter, consider storing your lights in a box or cabinets that may have some form of insulation. This helps to provide a more stable temperature inside. Storing solar lights properly is essential to keep them in good shape for their next use.

Where should solar lights be stored?

It may be worthwhile to store your solar lights properly. Consider storing them in order, in a location where the temperature is more stable. A stable temperature prevents extreme temperature changes, which should prevent your lights from breaking. If you have an insulated garage, storing your headlines inside the garage would normally do.
