

Taipei Portable Energy Storage Power Supply Purchase

Overview

How many MW of battery-based energy storage will Taiwan have by 2025?

Taiwan aims to accumulate a total of 590 MW of battery-based energy storage by 2025, with a target of 160 MW managed and procured by state-owned Taiwan Power Company (TPC), and 430MW to be developed via private-sector, independently operated storage facilities.

Are Taiwanese manufacturers implementing vertical integration in the energy storage industry?

There are Taiwanese manufacturers currently investing in each of the aspects of the energy storage industry, and some of them are implementing the vertical integration of the supply chain.

Why is energy storage important?

Energy storage is needed to effectively integrate intermittent solar and wind power into the grid with systems to match power supply and demand. For public projects, TPC, will announce public procurements. U.S companies can bid and sell their equipment to TPC.

What is Taiwan's energy policy?

Taiwan plans to generate 20% of its energy from renewable energy by 2025, up from approximately 5% in 2020. Overall energy policy calls for increased renewable energy and LNG, significantly less coal, and a “nuclear-free homeland”.
