# Tax rate for energy storage power supply in Sri Lanka

## Overview

---

How much energy does Sri Lanka use for transport?

In 2016, about 26% of Sri Lanka's total energy was used for transport. This is an increase from 23% in the year 2000. The per capita transport energy consumption was 128 kilotons of oil equivalent (ktoe)/person. (Note: All energy consumption data is from the year specified.).

Will Sri Lanka reach a 10% target in power generation by 2016?

The Government of Sri Lanka envisaged developing New Renewable Energy technologies to reach a 10% target in power generation by 2016. This target was successfully achieved a year ahead in 2015.

What is the aggregate cost of the electricity industry?

Since there are three major components in the electricity industry aggregate cost of all three components is the cost that consumer has to be paid through tariffs. The next question arises in case of cost estimation is "what Cost" and "How much" cost are to be amalgamated into the Tariffs.
