

There are many battery swap cabinets in Beijing

Overview

How many battery swap stations will China build in 2025?

The two companies aim to build “no fewer” than 500 battery swap stations in 2025 alone, with a long-term goal of building out 10,000 stations to create a seamless “swap-as-fast-as-refuelling” experience for electric vehicle (EV) owners across China.

How many Nio battery swap stations are there in China?

Nio has launched its 1,000th highway battery swap station in China, finalising a network that links 550 cities. The company now operates 3,399 swap stations nationwide, alongside over 2,800 supercharging stations, as it continues domestic and European expansion.

Are battery swapping stations feasible in Beijing?

Policy suggestions are made for battery swapping station development in Beijing. To enhance the energy saving, emission reduction, and economic feasibility of battery swapping stations (BSSs), this paper develops a BSS configuration and operation model with three charging strategies for Beijing.

Are China's largest energy companies building a battery swap network?

Two of China’s largest energy companies have announced plans to build a nationwide battery swap network, with 500 stations to be built this year, on the way to building a total of 10,000.
