

There are pure sine wave inverters for sale

Overview

What is a pure sine wave inverter?

A pure sine wave inverter is a device that converts DC power from a battery into AC power, allowing you to charge almost any household appliance or electronic device off-grid.

What are the different types of pure sine power inverters?

Pure Sine Power Inverters: 12-Volt, 24-Volt, 48-Volt Explore a vast assortment of top-quality pure sine power inverters at The Inverter Store. Get clean power to run all your sensitive and complex electronics.

How much does a sine wave inverter cost?

\$100-\$500 range: This is what you're likely to pay for most pure sine wave inverters on the market. These usually generate between 1,000 and 2,000 watts, so you can use one to power appliances in your off-grid cabin, RV, or boat. \$500 and above: This kind of money will get you a heavy-duty inverter with a power capacity from 3,000 to 12,000 watts.

Why do you need a sine wave inverter?

Most appliances in your home use AC power, so you need it to convert the DC power that solar panels produce to AC power. It also brings up the voltage to the grid level. A pure sine wave inverter also saves you money, as it's much more efficient than the older, jagged wave inverters.
