

Three-phase uninterruptible power supply manufacturer in Hamburg Germany

Overview

Why do we need an uninterruptible power supply (UPS) system?

In data centres, traffic control centres, on sensitive production lines and in many other fields, systems for the uninterruptible power supply (UPS systems) save lives and secure data, avoid costs, ensure order, protect infrastructures, and prevent situations arising that can threaten livelihoods.

What is a static uninterruptible power supply (UPS)?

Our static uninterruptible power supply (UPS) systems comply with the VFI-SS-11 classification according to IEC 62040-3. With their robust industrial design, they support a secure consumer supply in continuous operation.

What are the different types of ups technologies?

Contact Three UPS technologies are available for different requirements and applications: Offline UPS, Line-Interactive UPS and Online UPS. You know the area of application - we know the selection of the right UPS technology. Even for special requirements, such as in security technology, we find the perfect solution with our products and services.

Where can I find a Three-phase UPS?

You can find a Three-phase UPS among the 286 products on DirectIndustry, the industry specialist for your professional purchases. Brands include Schneider Electric, Eaton, and SALICRU.
