Overview

What is a solarfold photovoltaic container?

The Solarfold photovoltaic container can be used anywhere and is characterized by its flexible and lightweight substructure. The semi-automatic electric drive brings the mobile photovoltaic system over a length of almost 130 meters quickly and without effort into operation in a very short time.

What is a foldable solar container?

Foldable solar containers merge two mature technologies: lightweight foldable solar panels and ISO shipping containers. The systems, CDS Solar states, are standard containers with inverters, controllers, batteries, and hinged panel arrays built into them, which open while in use and fold up into a compact form to ship.

How many PV modules are in a solar container?

The innovative and mobile solar container contains 196 PV modules with a maximum nominal power rating of 130kWp, and can be extended with suitable energy storage systems. The lightweight, ecologically-friendly aluminium rail system guarantees a mobile solution with rapid availability. at full power.

What is a solarfold on-grid container?

The solarfold on-grid container can also be expanded with various storage solutions. Each package contains a different number of Solarfold containers and the appropriate battery capacity. These combinations are not only used to optimize personal consumption, but can also be particularly valuable for energy trading on the control energy market.
