How will Bess support France's decarbonised energy system?

Beyond financial gains, expanding BESS deployment will help mitigate renewable energy curtailments and ease pressure on the grid, making it a key enabler of France's decarbonised, resilient energy system.

Is France becoming a more attractive market for battery energy storage systems?

This report explores how France is becoming a more attractive market for battery energy storage systems (BESS). The French electricity system is dominated by nuclear and hydropower, which results in lower volatility – typically a driver of battery economics.

What is the potential for French Bess?

In the European context, the revenue potential for French BESS has so far been moderate. France's nuclear-heavy generation mix results in relatively stable wholesale prices and lower demand for balancing services.
