

Ups solar container lithium battery external lead-acid battery pack

Overview

Are lead acid UPS batteries recyclable?

Lead acid UPS batteries are also recyclable (up to 95% of materials) and can be supplied as individual battery blocks or replacement battery packs and battery kits. Server Room Environments provides UPS battery testing, replacement and eco-friendly disposal services.

What type of battery does a ups use?

The traditional battery in a UPS is a lead acid type of which the most commonly installed is the Valve Regulated Lead Acid (VRLA) type. This is a maintenance free battery with either a 5-year or 10-year design life.

How long do UPS batteries last?

UPS batteries are the energy storage device used within uninterruptible power supplies, standby power & emergency lighting systems, security & alarm panels and generator starter circuits. Most UPS systems use lead acid batteries. This type of UPS battery has a typical working life of 3-4years (5year design life) and 7-years (10year design life).

Are Vrla UPS batteries suitable for standby power applications?

VRLA UPS batteries are suitable for standby power applications. Ideal applications include use in uninterruptible power supplies and emergency lighting systems where the batteries are only called on to discharge intermittently. Ambient temperature also affects lead acid battery performance.
