

# **Village lighting project solar lights**

## Overview

---

What is the Solar Village initiative?

The Solar Village Initiative is an ongoing project founded in 2010 by Auroville Consulting to make the world a greener, better place (Irumbai village, near Auroville). One aspect of the initiative involves installing energy-efficient fans in homes to keep them cool and prevent the spread of disease-carrying mosquitoes.

Who is solar village?

Solar Village is a Norwegian company on a mission to improve African smallholder farmers' yields and quality of life, with our multifunctional solar Battery Stick™. We develop, manufacture, distribute and finance smart solar energy solutions tailored to the needs and aspirations of African smallholder farmers.

How solar street lights work in China?

Solar road lights are installed in more than 400 villages in China in first 2 years (2010-2012) Solar driven LED street lighting provides high-quality, cost-efficient lighting using sunlight instead of conventional electricity. During the day a solar panel converts solar energy into electrical energy that is stored in a battery.

How does solar LED street lighting work?

Solar driven LED street lighting provides high-quality, cost-efficient lighting using sunlight instead of conventional electricity. During the day a solar panel converts solar energy into electrical energy that is stored in a battery. When night falls, the battery discharges, releasing enough power for the LED luminaire to light the road.
