Overview

What is a battery test chamber?

Our battery test chambers are designed to test Lithium Ion batteries, lead acid, Battery Managements Systems (BMS), battery packs, modules, battery cells, and more. Our battery test chambers also offer many safety features that conform to IEC, UL and EUCAR testing standards for battery safety.

Why is battery safety testing in an environmental test chamber important?

Battery safety testing in an environmental test chamber can help keep people and products safety. Weiss Technik provides pre-engineered battery test and battery safety chambers. [Click to learn more.](#)

What is a battery charge & discharge test chamber?

The battery charge&discharge test chamber is a device specially designed for charging and discharging safety tests on batteries (such as lithium-ion batteries).This type of test chamber can simulate the extreme charge and discharge conditions that the battery may encounter in actual use to evaluate.

What are the fundamentals of battery testing?

Key fundamentals of battery testing include understanding key terms such as state of charge (SOC); the battery management system (BMS) which has important functions including communication, safety and protection; and battery cycling (charge and discharge) which is the core of most tests.
