

# **What is the Victoria solar container energy storage system**

## Overview

---

How many large-scale storage systems does Victoria have?

Victoria has 12 commissioned large-scale storage systems and 3 in commissioning – with a total output capacity of 1028 MW and storage capacity of more than 1.7 GWh. Storage capacity = how much total energy is stored in each battery. Output capacity = how much energy a battery can provide at a given time.

Will Trina Solar build a battery energy storage system in Australia?

Chinese PV module manufacturer Trina Solar has received the green light from the Victoria government in Australia to build a 500MW/1,000MWh battery energy storage system (BESS). Trina Solar will build the Kiewa Valley BESS in the northeastern part of the Australian state, in the Murray-Darling basin, to the east of Melbourne, the state capital.

How many energy storage projects are there in western Victoria?

In March 2018, 2 projects in Western Victoria were chosen to be part of The Energy Storage Initiative – one in Ballarat and one in Gannawarra. Construction for the Ballarat and Gannawarra Energy Storage Systems was completed in late 2018. Both batteries began operating over the summer of 2018 and 2019.

Why is Victoria a good place to store batteries?

Victoria is the home of big batteries and has legislated storage targets of at least 2.6 GW by 2030 and 6.3 GW by 2035 to provide crucial support for more renewable capacity. Storage is a vital part of our electricity grid. In the future, much of our energy will be generated closer to where it is used and the way we use it will be more efficient.
