

# **Where are the green base stations of Korean communications built**

## Overview

---

How many 5G base stations does South Korea have?

In the report, South Korea ranked first among 29 countries, including non-OECD members such as China and the European Union, in “5G base station deployment.” The country recorded 593 5G base stations per 100,000 inhabitants, significantly surpassing Lithuania (328) and Finland (251).

Does kt have a 5G network in South Korea?

As of 2024, KT is the only telecom provider in South Korea to have established a nationwide 5G SA network. KT launched its SA 5G service in 2021, becoming the first South Korean operator to do so. SK and LG U+ are operating their communication networks based on 5G NSA (Non-Standalone).

How many base stations will Korea have in 2023?

The Korean government attached an obligation to the spectrum licences for the 3.5 GHz band to install 45,000 base stations within 5 years, i.e., by the end of 2023, numbering up to 150,000 base stations within 10 years. According to the available data, the Korean MNOs succeeded in reaching the five-year target in 2020 (Cha, 2020).

How many base stations will Korea have in 2021?

Recently, the Korean government decided to reduce the existing goal of 45,000 base stations to be installed by the end of 2021 to 15,000 base stations for the 28 GHz band.
